

## **KSP to go<sup>®</sup>** is nominated for the Green Product Award 2020

*The second nomination of our **KSP to go<sup>®</sup>**-modular system for a „green award“, shows how ecological and long lasting these product series are. The internationally well-known Green Product Award rates new products in the categories sustainability, design, innovation and market opportunities. **KSP to go<sup>®</sup>**, the combination of long lasting, efficient radiant panels and flexible, economical LED-lamps, fits perfect with the award goals.*

With the nomination **KSP to go<sup>®</sup>** already won an exhibition space on the Green Campus on the Munich International Exhibition for construction, renovation, and (IHM). There everybody can experience the ideal combination of heating and lighting for small halls. The design of the LED-luminaires matches totally with the surface of the radiant panels.

Further arguments convincing the top-class jury of professors, designers, and marketing specialists, were energy efficiency, sustainability, maintenance freedom, recyclability and last but not least the very low life cycle costs of **KSP to go<sup>®</sup>**.

Our innovative modular system was honored already in 2019 with the German Brand Award and nominated for the German Federal Award for Ecodesign.

*Entering in the Green Product Award Selection 2020 our **KSP to go<sup>®</sup>**- modular system got another important honor.*
